

Statistical bulletin

Index of Production, UK: September 2022

Movements in the volume of production for UK production industries: manufacturing, mining, and quarrying, energy supply and water and waste management.

Release date: 11 November 2022 Next release: 12 December 2022

1. Main points

- Monthly production output rose by 0.2% between August and September 2022 and is now 0.3% above February 2020, which was the last month of "normal" trading conditions before the coronavirus (COVID-19) pandemic.
- The monthly rise in output resulted from strength in three of the four production sectors, with electricity and gas growing by 1.5%, mining and quarrying by 0.7%, and water supply and sewerage by 0.3%, while manufacturing remained flat.
- Manufacturing saw 10 of its 13 sub-sectors negatively contributing to growth during September as the
 manufacture of basic metals and metal products contributed negative 0.28 percentage points to the Index
 of Production (IoP) (with growth falling by 3.4%), manufacture of chemicals and chemical products
 contributed negative 0.14 percentage points (with growth falling by 3.0%), and manufacture of computer,
 electronic and optical products contributed negative 0.12 percentage points (with growth falling by 2.7%).
- Partially offsetting the negative growth in manufacturing was a positive contribution of 0.50 percentage points (with growth rising by 9.3%) from basic pharmaceutical products.
- Output remained below the February 2020 pre-coronavirus pandemic levels in the mining and quarrying sector (13.5% below) and the manufacturing sector (1.5% below).
- In contrast, water supply and sewerage, and electricity and gas were above the February 2020 level, at 13.9% and 10.6%, respectively.
- Production output for Quarter 3 (July to Sept) 2022 fell by 1.5%, compared with Quarter 2 (Apr to June) 2022, with falls in manufacturing (2.3%), water supply and sewerage (1.4%), and mining and quarrying (1.0%), while electricity and gas rose by 2.6%.
- Further analysis of the effect on our monthly IoP estimate is available in our <u>Gross domestic product (GDP) monthly estimate</u>, <u>UK: September 2022</u> bulletin, published 11 November 2022.

2. Index of Production (IoP) data

Index of Production time series

Dataset DIOP | Released 11 November 2022

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

Output of the production industries

Dataset | Released 11 November 2022

Index values and growth rates for production, manufacturing and the main industrial groupings in the UK.

Index of Production and industry sectors to four decimal places

Dataset | Released 11 November 2022

Monthly index values for production and the main Index of Production sectors in the UK to four decimal places.

Monthly Business Survey turnover in production industries

Dataset | Released 11 November 2022

Monthly Business Survey production industries' total turnover, domestic sales and exports in the UK. Figures are in current price and are non-seasonally adjusted.

Export proportions for manufacturing industries

Dataset | Released 11 November 2022

Monthly, quarterly and annual export data for the manufacturing industries, collected by the Monthly Business Survey at industry level in the UK.

All data related to the IoP are available on our Related data page.

3. Measuring the data

The Index of Production (IoP) uses data from a variety of sources. It is calculated by taking turnover and removing the impact of price changes, or by using direct volume estimates.

Most of these data are collected as "turnover values" through the Monthly Business Survey (MBS). In addition, direct volume series are collected by the Department for Business, Energy and Industrial Strategy (BEIS), and the International Steel Statistics Bureau (ISSB) for steel industries.

From January 2018, value added tax (VAT) data have also been included across 64 production industries for small- and medium-sized businesses. For more information, see our <u>VAT turnover data in National Accounts:</u> <u>background and methodology article</u>.

A comprehensive list of the IoP source data can be found in our Gross domestic product (GDP) source catalogue.

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in our <u>UK Index of Production Quality and Methodology Information (QMI)</u>.

Coronavirus (COVID-19)

The Office for National Statistics' (ONS) Monthly Business Survey (MBS) is fully online. Business owners can log on from any location and submit their data at an appropriate time. Most other data in the IoP come from the BEIS, and therefore will be less affected than the survey data.

Our latest data and analysis on the impact of the coronavirus pandemic on the UK economy and population are available on our <u>Coronavirus (COVID-19) data and analysis web page</u>. This is the hub for all special coronavirus-related publications, including the fortnightly Business Insights and Conditions Survey (BICS).

Economic statistics governance after EU exit

Following the UK's exit from the EU, new governance arrangements are being put in place. These will support the adoption and implementation of high-quality standards for UK economic statistics. These governance arrangements will promote international comparability and add to the credibility and independence of the UK's statistical system.

At the centre of this new governance framework, there will be the new National Statistician's Committee for Advice on Standards for Economic Statistics (NSCASE). NSCASE will support the UK by ensuring its processes for influencing and adopting international statistical standards are world leading. The advice that NSCASE provides to the National Statistician will span the full range of domains in economic statistics, including:

- · the national accounts
- · fiscal statistics
- prices
- · trade and the balance of payments
- labour market statistics

You can access further information on the NSCASE on the UK Statistics Authority's website.

International comparisons of GDP during the coronavirus (COVID-19) pandemic

Article | Released 1 February 2021

The coronavirus (COVID-19) pandemic has led to record declines in gross domestic product (GDP) in advanced economies in 2020. International comparisons show that the UK has experienced the largest contraction in GDP volume among the G7 countries. However, international comparisons have also been complicated by how National Statistical Institutes (NSIs) record non-market output.

Comparison of motor vehicle manufacturing output statistics, UK: 1997 to 2019

Article | Released 10 January 2020

Comparing measures of motor vehicle manufacturing compiled by the Office for National Statistics (ONS) and published in the Index of Production (IoP), with outputs from the Society of Motor Manufacturers and Traders (SMMT).

Comparing ONS's economic data with IHS Markit and CIPS Purchasing Managers' Index surveys

Article | Released 21 October 2019

A comparison between official estimates of UK output and diffusion indices, looking at the level of correlation between Office for National Statistics data and IHS Markit and Chartered Institute of Procurement and Supply Purchasing Managers' Indices.

GDP monthly estimate, UK: September 2022

Bulletin | Released 11 November 2022

Gross domestic product (GDP) measures the value of goods and services produced in the UK. It estimates the size of, and growth in, the economy.

Producer price inflation, UK: September 2022

Bulletin | Released 19 October 2022

Changes in the prices of goods bought and sold by UK manufacturers, including price indices of materials and fuels purchased (input prices) and factory gate prices (output prices).

UK manufacturers' sales by product: 2021 results

Bulletin | Released 23 August 2022

Estimates for UK manufacturers' sales by product (ProdCom) for 2021, including 2020 final sales data.

Energy Trends and Prices: monthly data

Bulletin | Last updated 27 October 2022

Provides statistics on energy prices and monthly production and consumption of coal, electricity, gas, oil and total energy in the UK.
