5. [Related links](#)

1 . Main points

- The households' saving ratio increased to 8.6% in Quarter 1 (Jan to Mar) 2020, compared with 6.6% in Quarter 4 (Oct to Dec) 2019.
- Households' consumption spending decreased by £9.5 billion (negative 2.7%) in Quarter 1 2020, the largest quarterly fall in nominal household spending of this type ever recorded; there were large falls in expenditure on motor vehicles, restaurants and hotels, and clothing and footwear.
- The households' net lending position increased to 2.6% of gross domestic product (GDP) in Quarter 1 2020 from 0.8% in Quarter 4 2019.
- General government saw an increase in its net borrowing position to negative 4.4% of GDP; the increase in borrowing was the largest since Quarter 3 (July to Sept) 2013 and was particularly driven by the introduction of the Coronavirus Job Retention Scheme (CJRS) late in the quarter.
- A fall in private non-financial corporations' gross operating surplus of £5 billion was seen in Quarter 1 2020 as a fall in profits was seen across almost all industries.
- Financial corporations saw a decrease in their net lending position to 0.5% of GDP in Quarter 1 2020 as they increased their acquisition of non-monetary gold.
- In Quarter 1 2020, domestic sectors and the rest of the world saw large changes in their financial account balance sheets as the UK and world financial markets anticipated the global coronavirus (COVID-19) pandemic.
- In the financial account, there has been evidence of a "Dash for Cash" as UK monetary financial institutions (MFIs) saw record increases in deposits placed with them on the quarter of £819.6 billion as investors switched to safer investments.
- In part, these deposits have been funded by the issuance of new loans by MFIs; they recorded their highest rise ever in short-term loans of £304.8 billion.

2 . Quarterly sector accounts data

[Quarterly sector accounts time series](#)

Dataset | Released 30 June 2020

Quarterly aggregate economic indicators and summary estimates for private non-financial corporations and households' sectors of the UK economy, and revisions.

[UK Economic Accounts](#)

Dataset | Released 30 June 2020

Quarterly estimates of national product, income and expenditure, sector accounts and balance of payments.

[UK Economic Accounts: main aggregates](#)

Dataset | Released 30 June 2020

Quarterly national accounts aggregates, per head data, including gross domestic product by income and expenditure, gross value added, gross fixed capital formation, change in inventories, gross operating surplus and revisions.

[UK Economic Accounts: total economy](#)

Dataset | Released 30 June 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for the UK total economy.

[UK Economic Accounts: flow of funds](#)

Dataset | Released 30 June 2020

Quarterly flow of funds, financial account and balance sheet data for the UK economy by institutional sector.

[UK Economic Accounts: institutional sector - general government](#)

Dataset | Released 30 June 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for general government.

[UK Economic Accounts: institutional sector - households and non-profit institutions serving households](#)

Dataset | Released 30 June 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for households and non-profit institutions serving households. Includes the Experimental Statistics on the impact of removing "imputed" transactions from real household disposable income and the saving ratio to better represent the economic experience of UK households.

[UK Economic Accounts: institutional sector - non-financial corporations](#)

Dataset | Released 30 June 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for non-financial corporations and sub-sectors.

[UK Economic Accounts: institutional sector - rest of the world](#)

Dataset | Released 30 June 2020

Distribution and use of income account and capital account, financial account and balance sheet quarterly data for the rest of the world.

[UK Economic Accounts: balance of payments - current account](#)

Dataset | Released 30 June 2020

Quarterly transactions in trade in goods and services, primary, secondary and investment income, transactions with EU and non-EU countries and capital account.

[UK Economic Accounts: balance of payments - financial account](#)

Dataset | Released 30 June 2020

Quarterly transactions associated with changes of ownership of the UK's foreign financial assets and liabilities, including direct, portfolio and other investment, sector analysis and government reserve assets.

[UK Economic Accounts: balance of payments – international investment position](#)

Dataset | Released 30 June 2020

Quarterly end-of-period balance sheet levels of UK external assets and liabilities, including direct, portfolio and other investment, sector analysis and government reserve assets.

3 . Glossary

Seasonal adjustment

All figures given in this bulletin are adjusted for seasonality, unless the financial accounts are under discussion or otherwise stated. Seasonal adjustment removes seasonal or calendar effects from data to enable more meaningful comparisons over time.

Current price

Current price series are expressed in terms of the prices during the time period being estimated. These describe the prices recorded at the time of production or consumption and include the effect of price inflation over time.

Chained volume measures

Chained volume series (also known as real terms) have had the effects of inflation removed.

Gross disposable household income (GDHI) and Real household disposable income (RHDI)

GDHI is the estimate of the total amount of income that households have available to either spend, save or invest including income received from wages (and the self-employed), social benefits, pensions and net property income (that is, earnings from interest on savings and dividends from shares) less taxes on income and wealth.

Adjusting GDHI to remove the effects of inflation gives RHDI. This is a measure of the real purchasing power of households' income, in terms of the physical quantity of goods and services they would be able to purchase if prices remained constant over time.

The households' saving ratio explained

The saving ratio estimates the amount of money households have available to save as a percentage of their gross disposable income plus pension accumulations.

Net lending or borrowing

The net lending of a sector represents the surplus resources that a sector makes available to other sectors, net borrowing represents their financing of a deficit from other sectors.

Net lending means a sector has money left over after its spending and investment in a given period, whereas net borrowing means it has spent and invested more than it received and has a need for financing, which may be covered by borrowing, issuing shares or bonds, or by drawing on reserves.

4 . Measuring the data

Rewvisions within this release

This bulletin includes new data for the latest available quarter, Quarter 1 (January to March) 2020 and revisions to data from Quarter 1 2019.

This bulletin follows the [National Accounts Revisions Policy](#).

Understanding the sector and financial accounts

This release presents analysis on UK aggregate data for the main economic indicators and summary estimates from the institutional sectors of the UK economy that are presented in the [UK Economic Accounts \(UKEA\) dataset](#):

- public corporations
- private non-financial corporations
- financial corporations
- households
- non-profit institutions serving households (NPISH)
- central government
- local government
- rest of the world

This release uses data from the UKEA and provides detailed estimates of national product, income and expenditure, UK sector, non-financial and financial accounts, and the UK balance of payments. These accounts are the underlying data that produce a single estimate of gross domestic product (GDP) using income, production and expenditure data.

Quality and Methodology Information report

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in the [Quarterly sector accounts QMII report](#).

5 . Related links

[GDP quarterly national accounts](#)

Publication | Released 30 June 2020

Revised quarterly estimate of gross domestic product (GDP) for the UK. Uses additional data to provide a more precise indication of economic growth than the first estimate.

[GDP first quarterly estimate](#)

Publication | Released 13 May 2020

First quarterly estimate of gross domestic product (GDP). Contains current and constant price data on the value of goods and services to indicate the economic performance of the UK.

[Balance of payments](#)

Publication | Released 30 June 2020

A measure of cross-border transactions between the UK and rest of the world. Includes trade, income, capital transfers and foreign assets and liabilities.

[Flow of funds](#)

Article | Released 7 November 2019

Aid for users to visualise the from-whom-to-whom estimates by using Sankey diagrams and heatmaps to show the counterparty relationships between institutional sectors.

[Alternative measure of households' saving ratio \(experimental\)](#)

Article | Released 8 October 2018

Experimental Statistics on the impact of removing "imputed" transactions from real household disposable income and the saving ratio to better represent the economic experience of UK households.

1 This data uses the latest population estimates with the exception of the latest year where populations projections are used. The quarterly data in this table does not sum to annuals

2 This data uses the UK resident population mid-year estimates published on 22 June 2017 and the population projections used are those published on 26 October 2017

3 The private non-financial corporations self-investment ratio is calculated by taking the sectors gross saving (RPKZ) and dividing it by their gross fixed capital formation (ROAW)

4 Quarterly Households debt to income ratio is calculated by taking the balance of Household debt (NIWK) and dividing it by the four quarter rolling sum of gross disposable income (HABN).

1 Quarterly alignment adjustment included in this series.

3 Total resources equals total uses.

2 These tables do not contain the most recent data for inventory holding gains for financial corporations and private non-financial corporations for 2015 onwards due to late processing of these data. This will be amended at the next opportunity, 23 Feb 2017 for 2016 data and 29 Sept 2017 for 2015 data.

PNFC2 Private Non-financial Corporations Sector (S.11002+S.11003)

Secondary Distribution of Income Account (II.2) and Capital Account (III.1)
