## 1. Other pages in this release

Other commentary from the latest labour market data can be found on the following pages:

- Labour market overview
- Average weekly earnings in Great Britain
- Vacancies and jobs

## 2. Main points for April to June 2019

- The UK employment rate was estimated at 76.1%, the joint highest on record since comparable records began in 1971.
- The UK unemployment rate was estimated at 3.9%; lower than a year earlier (4.0%); on the quarter the rate was 0.1 percentage points higher.
- The UK economic inactivity rate was estimated at 20.7%, a joint record low.

The data in this bulletin come from the Labour Force Survey, a survey of households. It is not practical to survey every household each quarter, so these statistics are estimates based on a large sample.

## 3. Analysis of employment in the UK

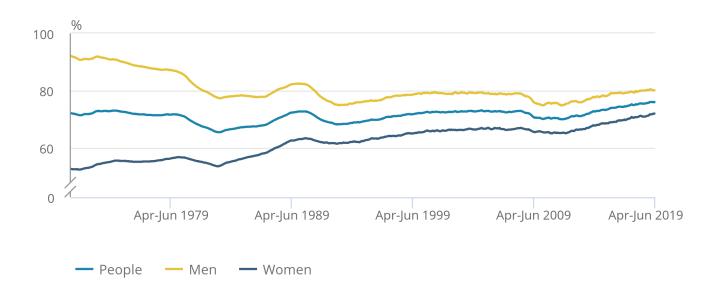

#### **Employment**

Figure 1: Employment rate for women was 72.1%, the highest on record

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to April to June 2019

## Figure 1: Employment rate for women was 72.1%, the highest on record

UK employment rates (aged 16 to 64 years), seasonally adjusted, January to March 1971 to April to June 2019

Source: Office for National Statistics - Labour Force Survey

<u>Employment</u> measures the number of people aged 16 years and over in paid work. The employment rate is the proportion of people aged from 16 to 64 years who are in paid work.

Estimated employment rates for men and women aged between 16 and 64 years have been generally increasing since early 2012. For April to June 2019, the estimated employment rate:

- for everyone was estimated at 76.1%, the joint highest on record since comparable records began in 1971
- for men was 80.1%; unchanged from a year earlier but down 0.2 percentage points on the quarter, the third consecutive quarterly decrease
- for women was 72.1%, the highest since comparable records began in 1971

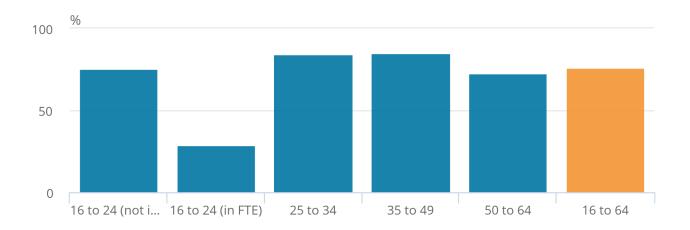

The increase in the employment rate for women in recent years is due partly to changes to the State Pension age for women, resulting in fewer women retiring between the ages of 60 and 65 years.

Figure 2: The highest employment rate, at 85.2%, was for those aged from 35 to 49 years

UK employment rates by age band, seasonally adjusted, April to June 2019

## Figure 2: The highest employment rate, at 85.2%, was for those aged from 35 to 49 years

UK employment rates by age band, seasonally adjusted, April to June 2019

Source: Office for National Statistics - Labour Force Survey

#### Notes:

1. FTE means full-time education. The "not in FTE" series includes people in part-time education and/or training.

Looking at the estimates for employment rates by age band for April to June 2019, the highest were for those aged from 35 to 49 years (85.2%) and for those aged from 25 to 34 years (84.4%).

Estimates for April to June 2019 show 32.81 million people aged 16 years and over in employment, 425,000 more than for a year earlier. This annual increase of 425,000 was mainly due to more people working full-time (up 262,000 on the year to reach 24.11 million). Part-time working also showed an increase of 162,000 on the year to reach 8.70 million.

Looking at the estimates for April to June 2019 by type of employment, there were:

- 27.67 million paid employees (84.3% of all people in employment), 216,000 more than a year earlier
- 4.96 million self-employed people (15.1% of all people in employment), 188,000 more than a year earlier

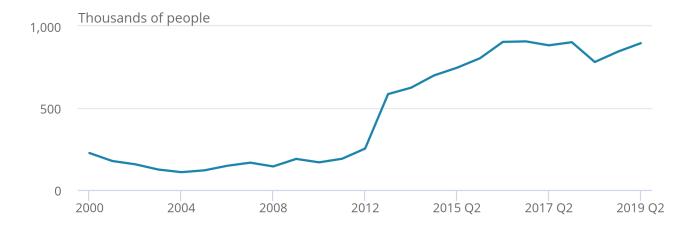

These estimates for paid employees and self-employed people make up over 99% of all people in employment. The total employment figure also includes two other minor categories as explained in the <u>Guide to labour market statistics</u>.

Figure 3: Number of people on zero-hour contracts increased sharply from 2010 to 2015

Number (thousands) of people in employment reporting they are on zero-hour contracts, October to December, each year 2000 to 2018, April to June, each year 2014 to 2019

## Figure 3: Number of people on zero-hour contracts increased sharply from 2010 to 2015

Number (thousands) of people in employment reporting they are on zero-hour contracts, October to December, each year 2000 to 2018, April to June, each year 2014 to 2019

Source: Office for National Statistics - Labour Force Survey

#### Notes:

- 1. The number of people who are shown as on a "zero-hours contract" at any point in time will be affected by whether people know they are on a "zero-hours contract" and will be affected by how aware they are of the concept.
- 2. Estimates presented are non-seasonally adjusted so comparisons of change should be made based on the same period each year. Additionally, estimates from surveys are subject to a degree of uncertainty.

There were an estimated 896,000 people (not seasonally adjusted) in employment on zero-hour contracts in their main job, 115,000 more than for a year earlier, but 8,000 fewer than the same period in 2016. This represents 2.7% of all people in employment for April to June 2019.

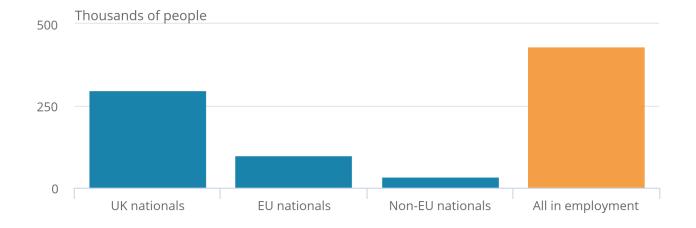

There is no single agreed definition of what "zero-hour contracts" are. While some contracts are explicitly called "zero-hour contracts", there are other definitions available and used in published statistics. The common element to the definitions is the lack of a guaranteed minimum number of hours. Detailed estimates are available at Dataset EMP17.

## Figure 4: The number of EU nationals working in the UK increased by 99,000 between April to June 2018 and April to June 2019

Changes in people in employment in the UK by nationality between April to June 2018 and April to June 2019, not seasonally adjusted

# Figure 4: The number of EU nationals working in the UK increased by 99,000 between April to June 2018 and April to June 2019

Changes in people in employment in the UK by nationality between April to June 2018 and April to June 2019, not seasonally adjusted

Source: Office for National Statistics - Labour Force Survey

#### Notes:

1. The components do not sum exactly to the total because the total series includes a small number of people who decline to inform our survey interviewers as to their country of birth and nationality.

Between April to June 2018 and April to June 2019, the estimated number of:

- UK nationals working in the UK increased by 298,000 to 29.08 million
- EU nationals working in the UK increased by 99,000 to 2.37 million
- non-EU nationals working in the UK increased by 34,000 to 1.29 million

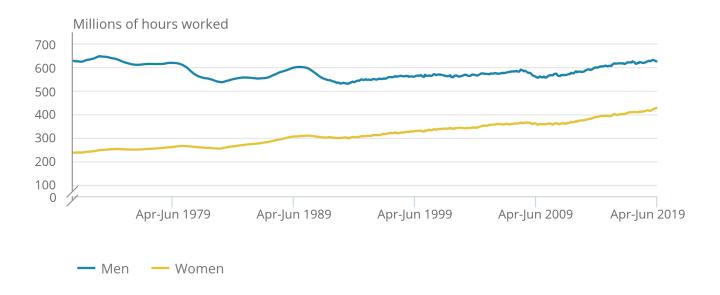

More information about labour market activity by nationality can be found in the <u>UK and non-UK people in the labour market article</u>, published alongside this release.

Figure 5: Hours worked by women have increased steadily since records began in 1971

Total weekly hours worked in the UK, seasonally adjusted, January to March 1971 to April to June 2019

## Figure 5: Hours worked by women have increased steadily since records began in 1971

Total weekly hours worked in the UK, seasonally adjusted, January to March 1971 to April to June 2019

Source: Office for National Statistics - Labour Force Survey

Since estimates began in 1971, total hours worked by women have generally increased, reflecting increases in both the employment rate for women and the UK population. In contrast, total hours worked by men have been relatively stable. This is because falls in the employment rate for men have been roughly offset by population increases.

Between April to June 2018 and April to June 2019:

- hours worked in the UK increased by 1.8% (to reach 1.05 billion hours)
- the number of people in employment in the UK increased by 1.3% (to reach 32.81 million)

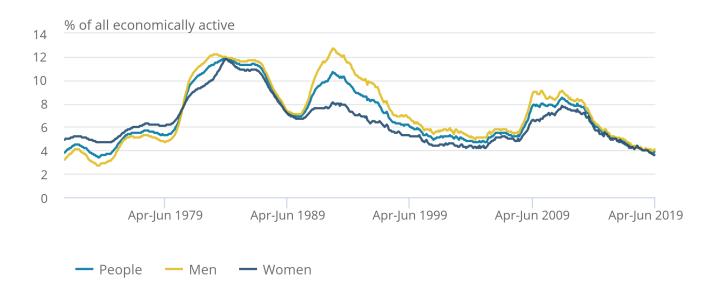

#### Unemployment

Figure 6: Unemployment rates have been generally falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to April to June 2019

## Figure 6: Unemployment rates have been generally falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, January to March 1971 to April to June 2019

Source: Office for National Statistics – Labour Force Survey

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

Estimated unemployment rates for both men and women aged 16 years and over have been generally falling since late 2013.

For April to June 2019, the estimated UK unemployment rate:

- was estimated at 3.9%, lower than a year earlier (4.0%); on the quarter the rate was 0.1 percentage points higher
- for men was 4.1%, slightly higher than a year earlier (4.0%)
- for women was 3.6%, the joint-lowest since comparable records began in 1971

Figure 7: Unemployment rates for men and women have been steadily falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, April to June 2014 to April to June 2019

## Figure 7: Unemployment rates for men and women have been steadily falling for the last five years

UK unemployment rates (aged 16 years and over), seasonally adjusted, April to June 2014 to April to June 2019

Source: Office for National Statistics - Labour Force Survey

Over the last five years the estimated unemployment rate:

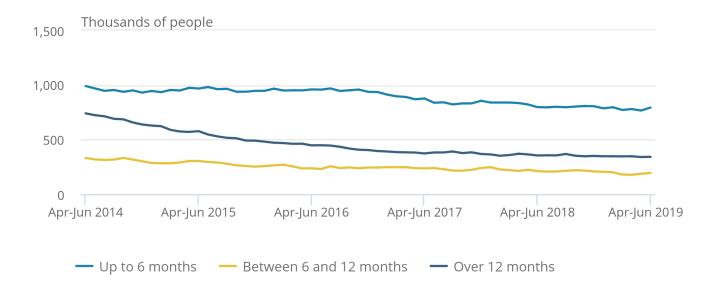

- for all people fell from 6.3% to 3.9%
- for men fell from 6.5% to 4.1%
- for women fell from 6.0% to 3.6%

Figure 8: Over the last five years long-term unemployment has more than halved

Unemployment in the UK by duration (aged 16 years and over), seasonally adjusted, April to June 2014 to April to June 2019

## Figure 8: Over the last five years long-term unemployment has more than halved

Unemployment in the UK by duration (aged 16 years and over), seasonally adjusted, April to June 2014 to April to June 2019

Source: Office for National Statistics - Labour Force Survey

For April to June 2019, an estimated 1.33 million people were unemployed, 33,000 fewer than a year earlier and 732,000 fewer than five years earlier. Looking in more detail at this fall of 732,000 unemployed people over the last five years:

- people unemployed for up to 6 months fell by 197,000 to 793,000
- people out of work for between 6 and 12 months fell by 137,000 to 194,000
- the largest fall was for people unemployed for over one year (down 398,000 to 342,000)

#### **Economic inactivity**

<u>Economic inactivity</u> measures people without a job but who are not classed as unemployed because they have not been actively seeking work within the last four weeks and/or they are unable to start work within the next two weeks. Our headline measure of economic inactivity is for those aged from 16 to 64 years.

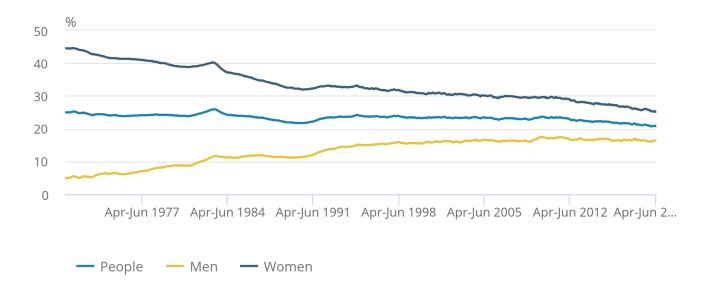

Since comparable records began in 1971, the economic inactivity rate for all people aged from 16 to 64 years has been generally falling (although it increased during recessions). This is due to a gradual fall in the economic inactivity rate for women.

#### Figure 9: Overall inactivity rate for people aged from 16 to 64 years was 20.7%, a joint-record low

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, January to March 1971 to April to June 2019

## Figure 9: Overall inactivity rate for people aged from 16 to 64 years was 20.7%, a joint-record low

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, January to March 1971 to April to June 2019

Source: Office for National Statistics - Labour Force Survey

For people aged from 16 to 64 years, for April to June 2019, the estimated economic inactivity rate:

- for all people was 20.7%, a joint-record low
- for men was 16.3%
- for women was 25.1%, a record low

Estimates for April to June 2019 showed 8.56 million people aged from 16 to 64 years not in the labour force (economically inactive). This was:

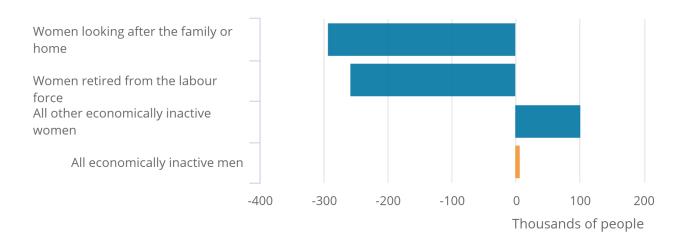

- 176,000 fewer than a year earlier
- 445,000 fewer than five years earlier

Figure 10: More women in the labour force is the main cause of the fall in economic inactivity

Changes in the number of economically inactive people (aged 16 to 64 years) in the UK, seasonally adjusted, between April to June 2014 and April to June 2019

## Figure 10: More women in the labour force is the main cause of the fall in economic inactivity

Changes in the number of economically inactive people (aged 16 to 64 years) in the UK, seasonally adjusted, between April to June 2014 and April to June 2019

Source: Office for National Statistics - Labour Force Survey

Looking in more detail at the estimated fall of 445,000 in economic inactivity over the last five years, it was driven by women (a fall of 451,000). Conversely there was a small increase in economic activity for men over the last 5 years (7,000).

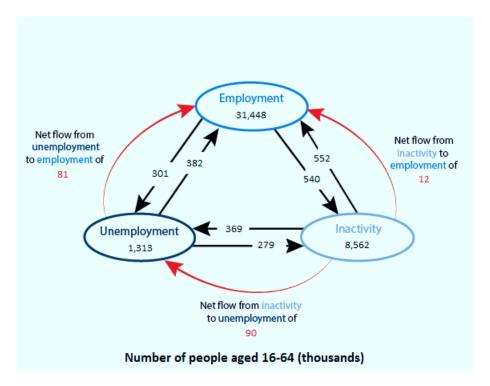

The categories showing the largest falls were:

- women younger than 65 years retiring from the labour force (down 258,000)
- women looking after the family or home (down 293,000)

This reflects ongoing changes to the State Pension age, resulting in fewer women retiring between the ages of 60 and 65 years, as well as more women in younger age groups participating in the labour market.

Figure 11: There was a net flow of 81,000 from unemployment to employment

Flows between employment, unemployment and economic inactivity between January to March 2019 and April to June 2019, UK, seasonally adjusted

Source: Office for National Statistics - Labour Force Survey

Looking at estimates of flows between employment, unemployment and economic inactivity between January to March 2019 and April to June 2019, there was a net flow of:

- 81,000 people from unemployment to employment
- 90,000 people from economic inactivity to unemployment
- 12,000 people from economic inactivity to employment

These estimates of labour market flows have not been designated as National Statistics.

## 4. Employment data

The data in this bulletin follow internationally accepted definitions specified by the <u>International Labour Organisation</u>. This ensures that the estimates for the UK are comparable with those for other countries.

#### Employment, unemployment and economic inactivity

Dataset A05 SA | Released 13 August 2019

Estimates of UK employment, unemployment and economic inactivity broken down into age bands.

#### Full-time, part-time and temporary workers

Dataset EMP01 SA | Released 13 August 2019

Estimates of UK employment including a breakdown by sex, type of employment and full-time and part-time working.

#### Actual weekly hours worked

Dataset HOUR01 SA | Released 13 August 2019

Estimates for the hours that people in employment work in the UK.

#### Unemployment by age and duration

Dataset UNEM01 SA | Released 13 August 2019

Estimates of unemployment in the UK including a breakdown by sex, age group and the length of time people are unemployed.

#### Economic inactivity by reason

Dataset INAC01 SA | Released 13 August 2019

Estimates of those not in the UK labour force measured by the reasons given for inactivity.

### 5. Glossary

#### Actual and usual hours worked

Statistics for <u>usual hours worked</u> measure how many hours people usually work per week. Compared with <u>actual hours worked</u>, they are not affected by absences and so can provide a better measure of normal working patterns. For example, a person who usually works 37 hours a week but who was on holiday for a particular week would be recorded as working zero actual hours for that week, while usual hours would be recorded as 37 hours.

#### **Economic inactivity**

People not in the labour force (also known as <u>economically inactive</u>) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged from 16 to 64 years who are not in the labour force.

#### **Employment**

<u>Employment</u> measures the number of people in paid work, and differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged from 16 to 64 years who are in paid work. A more detailed explanation is available in our Guide to labour market statistics.

#### Unemployment

<u>Unemployment</u> measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

A more detailed glossary is available.

### 6. Measuring the data

This bulletin relies on data collected from the <u>Labour Force Survey</u>, the largest household survey in the UK.

The <u>Quality and Methodology Information (QMI)</u> report pulls together important qualitative information on the various dimensions of data quality, as well as providing a summary of the methods used to compile the output.

The <u>Labour Force Survey performance and quality monitoring reports</u> provide data on response rates and other quality-related issues for the Labour Force Survey.

## 7. Strengths and limitations

The figures in this bulletin come from the Labour Force Survey, which gathers information from a sample of households across the UK rather than from the whole population. The sample is designed to be as accurate as possible given practical limitations such as time and cost constraints. Results from sample surveys are always estimates, not precise figures. This can have an impact on how changes in the estimates should be interpreted, especially for short-term comparisons.

As the number of people available in the sample gets smaller, the variability of the estimates that we can make from that sample size gets larger. Estimates for small groups (for example, unemployed people aged from 16 to 17 years), which are based on quite small subsets of the Labour Force Survey sample, are less reliable and tend to be more volatile than for larger aggregated groups (for example, the total number of unemployed people).

In general, changes in the numbers (and especially the rates) reported in this bulletin between three-month periods are small and are not usually greater than the level that can be explained by sampling variability. Short-term movements in reported rates should be considered alongside longer-term patterns in the series and corresponding movements in other sources to give a fuller picture.

Further information is available in A guide to labour market statistics.

Table 1: Summary of UK employment estimates for April to June 2019, seasonally adjusted

	Estimate (seasonally adjusted)	Sampling variability of estimate (1)	Change on quarter	Sampling variability of change on quarter (1)	Change on year	Sampling variability of change on year (1)
Employment (thousands of people aged 16 years and over)	32,811	± 177	115	± 150	425	± 238
Employment rate (%, aged 16 to 64 years)	76.1%	± 0.4	0.0	± 0.3	0.6	± 0.5
Unemployment (thousands of people aged 16 years and over)	1,329	± 68	31	± 73	-33	± 95
Unemployment rate (%, aged 16 years and over)	3.9%	± 0.2	0.1	± 0.2	-0.1	± 0.3
Economically inactive (thousands of people aged 16 to 64 years)	8,562	± 154	-47	± 133	-176	± 208
Economic inactivity rate (%, aged 16 to 64 years)	20.7%	± 0.4	-0.1	± 0.3	-0.5	± 0.5

The Office for Statistics Regulation (OSR) has a planned reassessment of Labour Market employment estimates which aims to publish a set of recommendations in early 2020. As part of this assessment, the OSR may contact you to:

- gather feedback on your use of LM estimates
- listen to your suggestions on ways we can build on our current engagement opportunities
- capture examples of where we have worked (or are working) together to improve communication and use
  of our statistics

The three sections of the recommendations report will cover trustworthiness, quality and value. The OSR will coordinate engagement with you but please feel free to contact David Freeman (<a href="mailto:david.freeman@ons.gov.uk">david.freeman@ons.gov.uk</a>) or Matt Hughes (<a href="mailto:matthew.hughes@ons.gov.uk">matthew.hughes@ons.gov.uk</a>) if you wish to discuss further.

#### Labour market economic commentary

Article | Released 13 August 2019

Additional economic analysis of the latest UK labour market headline statistics and long-term trends.

#### Regional labour market statistics in the UK

Bulletin | Released 13 August 2019

Regional, local authority and Parliamentary constituency breakdowns of changes in UK employment, unemployment, economic inactivity and other employment-related statistics.

#### UK and non-UK people in the labour market

Article | Released 13 August 2019

Estimates of labour market activity by nationality and country of birth.

#### Public sector employment

Bulletin | Released 11 June 2019

Quarterly estimates of the number of people employed in the public and private sectors in the UK. The public sector comprises central government, local government and public corporations.

#### Young people not in education, employment or training

Bulletin | Released 21 May 2019

Quarterly bulletin examining estimates of men and women aged from 16 to 24 years in the UK who are not studying or in employment.

#### Working and workless households in the UK

Bulletin | Released 29 May 2019

Commentary on quarterly estimates of the economic status of UK households and the people living in them.

### **Index of Tables**

The table below provides an index of the tables appearing in this Statistical Bulletin and it shows how these table numbers match up with the Excel spreadsheet datasets which are available on the website at:

https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/employmentandemployeetypes/bulletins/uklabourmarket/august2019/relateddata

The complete set of labour market tables is available from the Labour Market Overview bulletin.

Force

Survey

@ons.gov.uk

- 1. The Labour Force Survey (LFS) is a survey of households in the UK.
- 2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.
- 3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.
- 4. The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

#### Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

#### Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

 $1. \ The \ split \ between \ full-time \ and \ part-time \ employment \ is \ based \ on \ respondents' \ self-classification.$ This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.
 These series cover Employees and Self-employed only. These series include some temporary employees recorded in columns 13 to 19.
 The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of columns 21, 23, 24 and 25.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

<sup>1.</sup> The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.

<sup>2.</sup> This series consists of all 27 EU member states excluding the UK. This series equals the sum of EU14, EU8, EU2 and Other EU.

<sup>3.</sup> Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.

<sup>4.</sup> Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic and Slovenia.

<sup>5.</sup> Romania and Bulgaria.

<sup>6.</sup> Cyprus, Malta and Croatia

<sup>7.</sup> Total Non-EU equals the sum of Other Europe, Total Africa, Total Asia and Total America and Oceania

Source: Labour Force Survey Labour market statistics enquiries: labour.market@ons.gov.uk

<sup>1.</sup> The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series.

<sup>2.</sup> This series consists of all 27 EU member states excluding the UK.

<sup>3.</sup> This series consists of those people whose main reason for being economically inactive was because they were students. It does not include all students as some students will be included in the employment and unemployment estimates.

Source: Labour Force Survey

<sup>1.</sup> Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:
<a href="https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet/latest">https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet/latest</a>

<sup>2.</sup> People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

<sup>3.</sup> Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

### 17 International comparisons of employment and unemployment

Sources: EUROSTAT, OECD, national statistical offices. Labour market statistics enquiries: labour.market@ons.gov.uk

(\*) Note: The UK rates shown in this table are as published by EUROSTAT (the EUs statistical office). See Table 1 for the latest rates for the UK as published by ONS.

- 1. All employment rates shown in this table are for those aged from 15 to 64 except for the rate for the United States published by OECD which are for those aged from 16 to 64.
- 2. The employment rates for the EU are published by EUROSTAT and are not seasonally adjusted. EUROSTAT do not publish seasonally adjusted (SA) employment rates but SA rates for some EU countries are published by OECD. These OECD employment rates are available on our website at dataset A10.
- 3. Unemployment rates published by EUROSTAT for most EU countries (but not for the UK), are calculated by extrapolating from the most recent LFS data using monthly registered unemployment data. A standard population basis (15-74) is used by EUROSTAT except for Spain, Italy and the UK (16-74). The unemployment rate for the US is based on those aged 16 and over, but the rates for Canada and Japan are for those aged 15 and over. All unemployment rates shown in this table are seasonally adjusted.
- 4. The "Total EU" series consist of all 28 EU countries. The Eurozone figures consist of the following EU countries: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovak Republic, Slovenia and Spain.
- 5. The EU unemployment rates are as published on the EUROSTAT database. For Sweden the rates on the database differ from those shown in the EUROSTAT News Release published on 31 July 2019. This is because the figures for Sweden on the database are seasonally adjusted estimates but the figures for Sweden shown in the News Release are the trend component.

### 18 Labour disputes

United Kingdom, not seasonally adjusted

	Working days lost (thousands) 1,2	Working days lost in the Public Sector (thousands) <sup>1,2</sup>	Working days lost in the Private Sector (thousands) <sup>1,2</sup>	Number of stoppages <sup>3</sup>	Number of stoppages in the Public Sector	Number of stoppages in the Private Sector	Workers involved (thousands) <sup>1,3</sup>

Relationship between columns 1=2+3; 4=5+6

Data source: ONS Labour Disputes Survey

Labour disputes enquiries 01633 455400

<sup>1.</sup> Estimates of working days lost and workers involved are shown to the nearest thousand. Unrounded estimates of less than 500 therefore round to zero.

<sup>2.</sup> Due to rounding the working days lost for the public and private sectors may not add up to the total working days lost.

<sup>3.</sup> The latest 12 month cumulative totals for the figures in these columns will not necessarily equal the sum of the 12 months as some disputes continue for over one month. These disputes appear in each month's data, but only once in the total.

## REDUNDANCIES 22 Redundancies: level and rates'
