Release date:  
21 April 2020

Next release:  
19 May 2020

## Notice

### 21 April 2020

The effect of the coronavirus (COVID-19) pandemic on our capacity means we have reviewed the existing labour market releases and will be suspending some publications.

This will protect the delivery and quality of our remaining labour market outputs as well as ensuring we can respond to new demands as a direct result of COVID-19. More details about the impact on labour market outputs can be found in our [statement](#).

### 13 May 2020

A formatting error caused the unemployment rate to display incorrectly in Table 1 of this release. This has now been corrected. The rate is displayed correctly elsewhere in the bulletin and in the related datasets. We apologise for any inconvenience caused.

- [Vacancies and jobs](#)

## 2 . Main points

- The estimates presented in this bulletin cover the period prior to the implementation of the coronavirus (COVID-19) social distancing measures.
- The UK employment rate in the three months to February 2020 was estimated at a record high of 76.6%, 0.4 percentage points higher than a year earlier and 0.2 percentage points up on the previous quarter.
- The UK unemployment rate for the three months to February 2020 was estimated at 4.0%, largely unchanged compared with a year earlier and 0.1 percentage point higher than the previous quarter.
- In real terms (after adjusting for [inflation](#)), annual growth is estimated to be 1.2% in total pay and 1.3% in regular pay in the three months to February 2020, both down from a recent peak of 2.0% in the three months to June 2019.
- There were an estimated 795,000 vacancies in the UK in January to March 2020; this is 52,000 fewer than a year earlier and 6,000 fewer than the previous quarter.
- [Earnings and employment from Pay As You Earn \(PAYE\) Real Time Information \(RTI\), UK: April 2020](#) is also released today; this is an experimental monthly estimate of paid employees and their pay from PAYE RTI and includes a flash estimate of paid employees for March 2020.

The data in this bulletin come from surveys of households and businesses. It is not possible to survey every household and business each month, so these statistics are estimates based on samples.

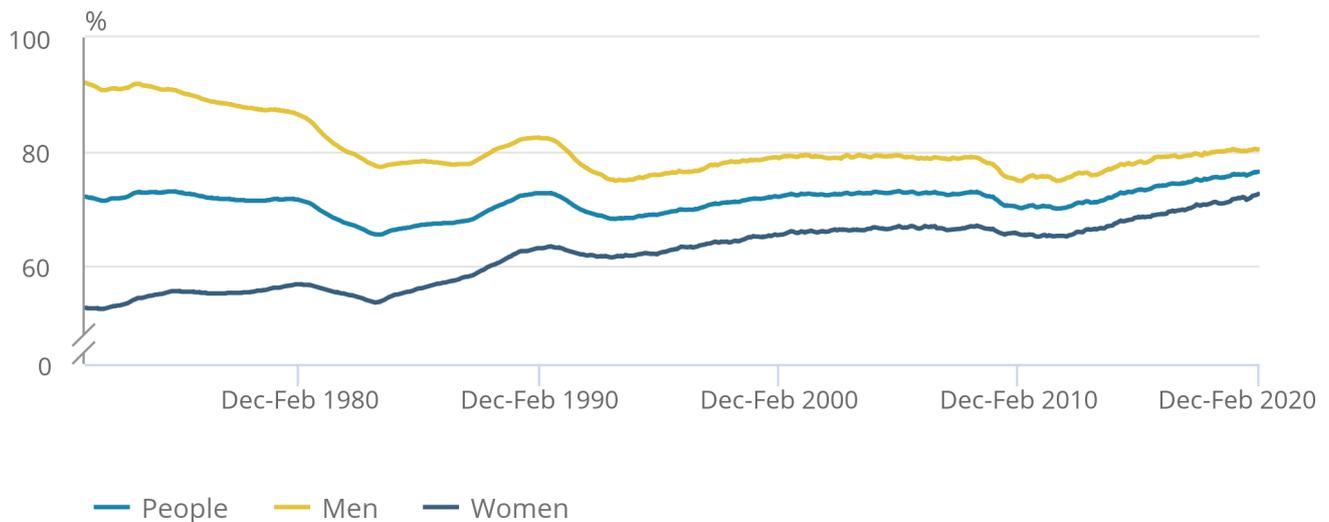

### 3 . Employment

**Figure 1: The employment rate for all people increased by 0.4 percentage points on the year to a record high of 76.6%**

UK employment rates (aged 16 to 64 years), seasonally adjusted, between January to March 1971 and December 2019 to February 2020

Figure 1: The employment rate for all people increased by 0.4 percentage points on the year to a record high of 76.6%

UK employment rates (aged 16 to 64 years), seasonally adjusted, between January to March 1971 and December 2019 to February 2020

Source: Office for National Statistics – Labour Force Survey

[Employment](#) measures the number of people aged 16 years and over in paid work. The employment rate is the proportion of people aged between 16 and 64 years who are in paid work.

Estimated employment rates for people aged between 16 and 64 years have generally been increasing since early 2012. Recent increases have largely been driven by increases in the employment rate for women (Figure 1).

For December 2019 to February 2020:

- the estimated employment rate for all people was at a record high of 76.6%; this is 0.4 percentage points up on the year and 0.2 percentage points up on the quarter
- the estimated employment rate for men was 80.5%; this is largely unchanged on the year and 0.1 percentage points up on the quarter
- the estimated employment rate for women was at a record high of 72.7%; this is 0.9 percentage points up on the year and 0.3 percentage points up on the quarter

The increase in the employment rate for women in recent years is partly a result of changes to the State Pension age for women, resulting in fewer women retiring between the ages of 60 and 65 years. However, since the equalisation of the State Pension age, the employment rate for women has continued to rise.

Estimates for December 2019 to February 2020 show a record 33.07 million people aged 16 years and over in employment, 352,000 more than a year earlier. This annual increase was mainly driven by women in employment (up by 318,000 on the year to a record high of 15.73 million), workers aged above 50 years (up by 258,000 to a record high of 10.70 million) and aged 25 to 34 years (up by 96,000 to a record high of 7.64 million), self-employed workers (up by 195,000 to 5.03 million), and full-time employees (up by 184,000 to a record high of 20.87 million). The annual increase for self-employed women (up by 140,000 to a joint record of 1.72 million) was the largest since May to July 2014.

There was a 172,000 increase in employment on the quarter. This was, again, mainly driven by women in employment (up 143,000), workers aged 18 to 24 years (up 66,000 to 3.49 million) and aged above 65 years (up 62,000 to a record high of 1.39 million), and full-time employees (up 107,000). More information about employment can be found in the [Employment in the UK bulletin](#), published alongside this release.

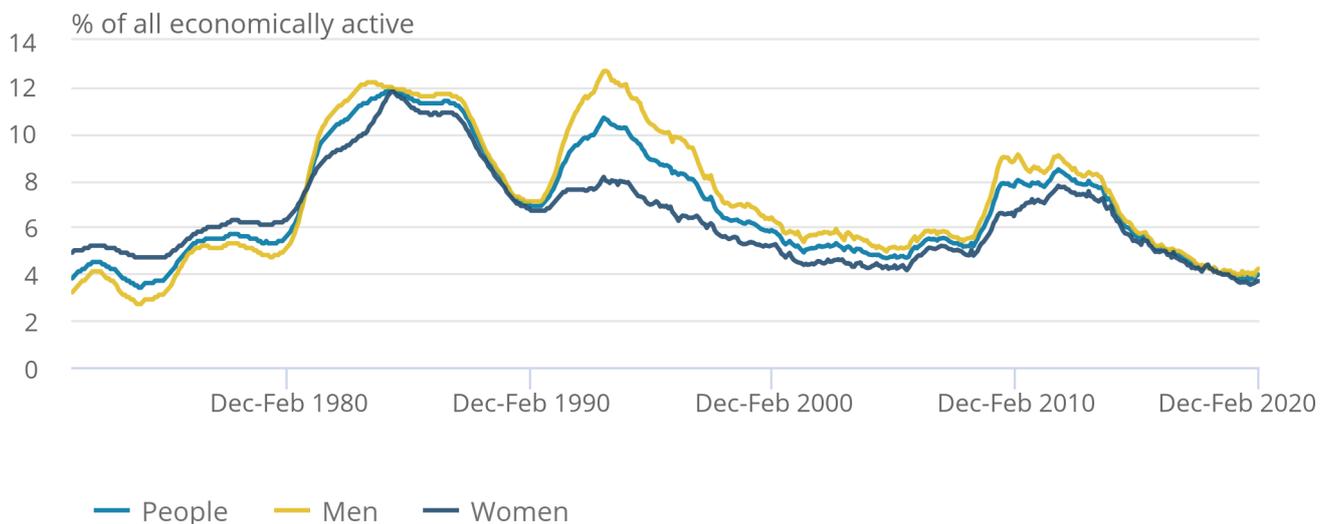

## 4 . Unemployment

**Figure 2: The unemployment rate for all people was largely unchanged on the year, at 4.0%**

UK unemployment rates (aged 16 years and over), seasonally adjusted, between January to March 1971 and December 2019 to February 2020

Figure 2: The unemployment rate for all people was largely unchanged on the year, at 4.0%

UK unemployment rates (aged 16 years and over), seasonally adjusted, between January to March 1971 and December 2019 to February 2020

Source: Office for National Statistics – Labour Force Survey

[Unemployment](#) measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

Estimated unemployment rates for both men and women aged 16 years and over have generally been falling since late 2013 but have levelled off in recent periods (Figure 5).

For December 2019 to February 2020:

- the estimated UK unemployment rate for all people was 4.0%; this is largely unchanged compared with a year earlier and 0.1 percentage point higher than the previous quarter
- the estimated UK unemployment rate for men was 4.2%; this is 0.2 percentage points higher than a year earlier and 0.2 percentage points higher than the previous quarter
- the estimated UK unemployment rate for women was 3.7%; this is down by 0.1 percentage point on the year but up by 0.1 percentage point on the quarter

For December 2019 to February 2020, an estimated 1.36 million people were unemployed. This is 22,000 more than a year earlier but 476,000 fewer than five years earlier. The small increase on the year is the second annual increase in unemployment since May to July 2012, and it was driven by a 32,000 increase for men.

More information about unemployment can be found in the [Employment in the UK bulletin](#), published alongside this release.

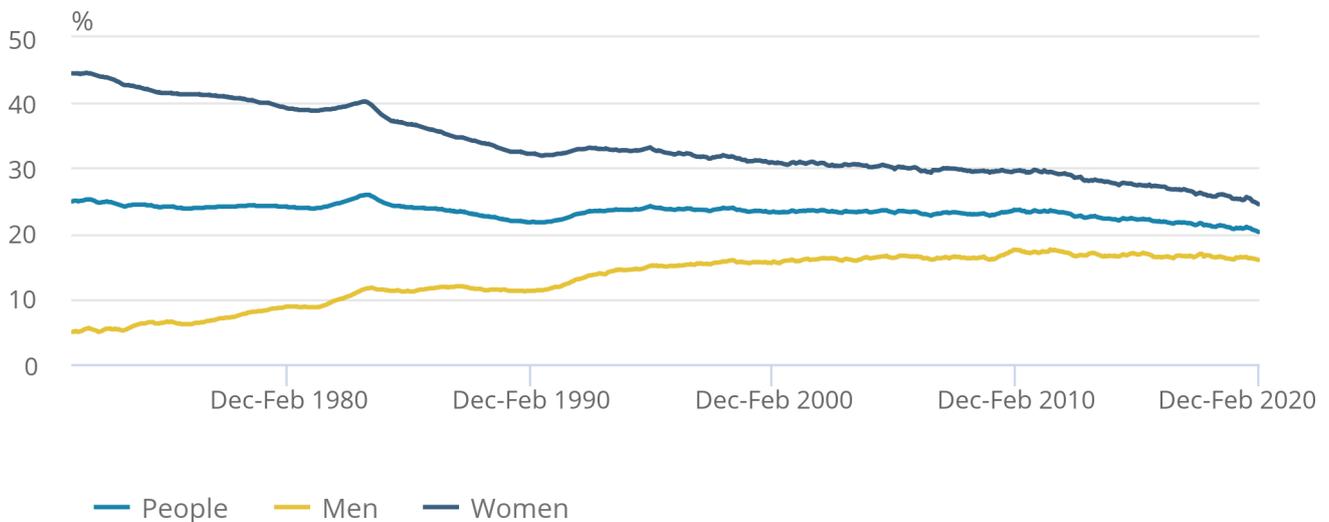

## 5 . Economic inactivity

**Figure 3: The overall inactivity rate for people aged between 16 and 64 years was a record low of 20.2%, down 0.4 percentage points on the year**

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, between January to March 1971 and December 2019 to February 2020

Figure 3: The overall inactivity rate for people aged between 16 and 64 years was a record low of 20.2%, down 0.4 percentage points on the year

UK economic inactivity rate (all people aged 16 to 64 years), seasonally adjusted, between January to March 1971 and December 2019 to February 2020

Source: Office for National Statistics – Labour Force Survey

[Economic inactivity](#) measures people without a job but who are not classed as unemployed because they have not been actively seeking work within the last four weeks and/or they are unable to start work within the next two weeks. Our headline measure of economic inactivity is for those aged between 16 and 64 years.

Since comparable records began in 1971, the economic inactivity rate for all people aged between 16 and 64 years has generally been falling (although it increased during recessions). This is because of a gradual fall in the economic inactivity rate for women (as seen in Figure 8). Over recent years, the economic inactivity rate for men has been relatively flat.

For people aged between 16 and 64 years, for December 2019 to February 2020:

- the estimated economic inactivity rate for all people was a record low of 20.2%; this is down by 0.4 percentage points on the year and down by 0.3 percentage points on the quarter
- the estimated economic inactivity rate for men was 15.9%; this is down by 0.1 percentage point on the year and down by 0.2 percentage points on the quarter
- the estimated economic inactivity rate for women was a record low of 24.5%; this is down by 0.8 percentage points on the year and by 0.4 percentage points down on the quarter

Estimates for December 2019 to February 2020 show 8.37 million people aged between 16 and 64 years not in the labour force (economically inactive). This was 166,000 fewer than a year earlier and 641,000 fewer than five years earlier. The annual decrease was mainly driven by women, with the level down by 157,000 to reach a record low of 5.09 million.

More information about economic inactivity can be found in the [Employment in the UK bulletin](#), published alongside this release.

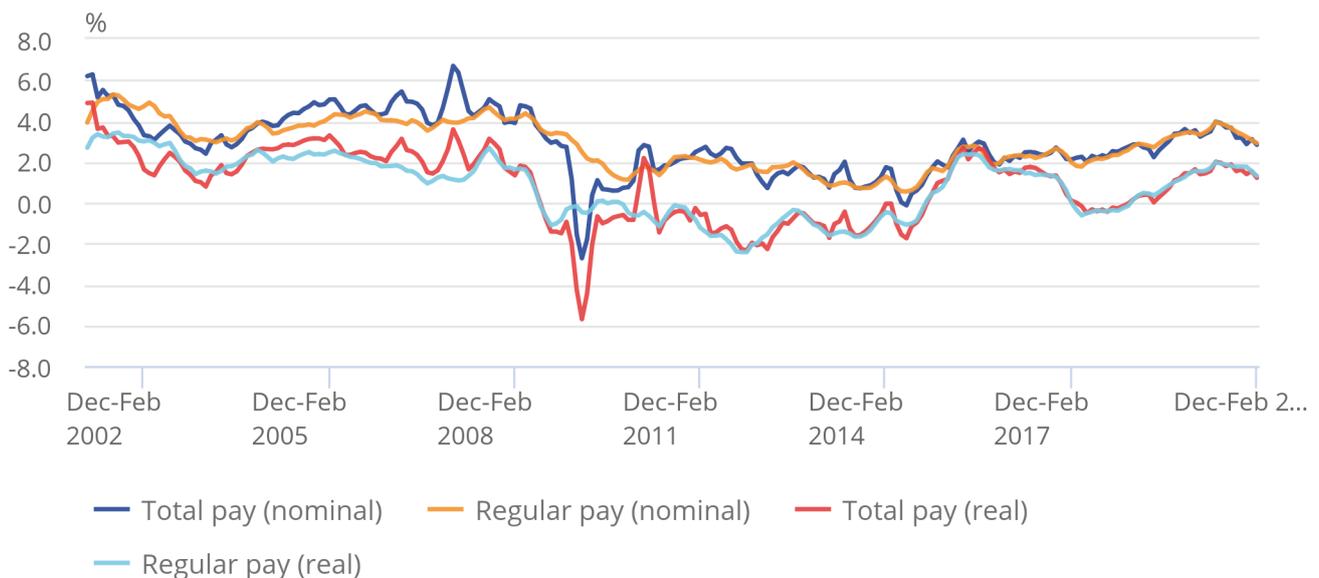

## 6 . Earnings growth

**Figure 4: Pay growth for employees in total pay (including bonuses) is estimated to be 2.8%; this translates to 1.2% in real terms**

Great Britain average weekly earnings annual growth rates, seasonally adjusted, January to March 2001 to December 2019 to February 2020

Figure 4: Pay growth for employees in total pay (including bonuses) is estimated to be 2.8%; this translates to 1.2% in real terms

Great Britain average weekly earnings annual growth rates, seasonally adjusted, January to March 2001 to December 2019 to February 2020

Source: Office for National Statistics – Monthly Wages and Salaries Survey

The earnings estimates are not just a measure of pay rises as they also reflect changes in the number of paid hours worked and changes in the structure of the workforce, for example, more high-paid jobs would have an upward effect on earnings growth rates.

The rate of pay growth trended upwards from spring 2017. In April to June 2019, it reached 4.0% for total pay and 3.9% for regular pay, the highest nominal pay growth rates since 2008. However, since then growth has slowed. In December 2019 to February 2020, it stood at 2.8% for total pay and 2.9% for regular pay.

In real terms, annual pay growth has been positive since the three months to February 2018. This means that during that period, pay has been growing faster than inflation. Growth in real terms for both total pay and regular pay reached a recent peak of 2.0% in the three months to June 2019, before decreasing to 1.2% for total pay and 1.3% for regular pay in the three months to February 2020.

More information about earnings growth can be found in the [Average weekly earnings in Great Britain](#) bulletin, published alongside this release.

## 7 . Vacancies

**Figure 5: January to March 2020 saw the tenth consecutive annual decrease in job vacancies**

Number of vacancies in the UK, seasonally adjusted, between January to March 2002 and January to March 2020

### Figure 5: January to March 2020 saw the tenth consecutive annual decrease in job vacancies

Number of vacancies in the UK, seasonally adjusted, between January to March 2002 and January to March 2020

Source: Office for National Statistics – Vacancy Survey

The estimated [number of vacancies](#) in the UK fell sharply during the recession of 2008 to 2009. Since 2012, it has generally increased, reaching a record high of 855,000 in November 2018 to January 2019. For January to March 2020, there were an estimated 795,000 vacancies in the UK; this is 6,000 fewer than in the previous quarter (October to December 2019), which is not a [statistically significant](#) change, and 52,000 fewer than a year earlier.

More information about vacancies can be found in the [Vacancies and jobs in the UK bulletin](#), published alongside this release.

## 8 . Labour market data

### [Summary of labour market statistics](#)

Dataset A01 | Released 21 April 2020

Estimates of employment, unemployment and other employment-related statistics for the UK.

### [Employment, unemployment and economic inactivity](#)

Dataset A02 SA | Released 21 April 2020

Estimates of UK employment, unemployment and economic inactivity for people aged 16 years and over and people aged between 16 and 64 years based on the Labour Force Survey (LFS).

### [Average weekly earnings](#)

Dataset EARN01 | Released 21 April 2020

Estimates of Great Britain earnings growth based on the Monthly Wages and Salaries Survey.

### [Vacancies by industry](#)

Dataset VACS02 | Released 21 April 2020

Estimates of the number of UK job vacancies for each industry, based on a survey of businesses.

View all related data on the [related data page](#). Alternatively, [Nomis](#) provides free access to the most detailed and up-to-date UK labour market statistics from official sources.

Table 1: Labour Force Survey sampling variability (95% confidence intervals)  
 Sampling variability (95% confidence intervals) of UK Labour Force Survey estimates, December 2019 to  
 February 2020

	Level	Sampling variability of level (*)	Change on quarter	Sampling variability of change on quarter (*)	Change on year	Sampling variability of change on year (*)
Employment (000s, aged 16 and over)	33,073	± 181	172	± 152	352	± 240
Employment rate (aged 16 to 64)	76.6%	± 0.4	0.2	± 0.3	0.4	± 0.5
Average weekly hours	31.8	± 0.2	-0.2	± 0.2	-0.4	± 0.3
Unemployment (000s, aged 16 and over)	1,364	± 71	58	± 76	22	± 98
Unemployment rate (aged 16 and over)	4.0%	± 0.2	0.1	± 0.2	0.0	± 0.3
Economically active (000s, aged 16 and over)	34,437	± 173	230	± 148	374	± 231
Economic activity rate (aged 16 to 64)	79.8%	± 0.4	0.3	± 0.3	0.4	± 0.5
Economically inactive (000s, aged 16 to 64)	8,370	± 155	-136	± 133	-166	± 208
Economic inactivity rate (aged 16 to 64)	20.2%	± 0.4	-0.3	± 0.3	-0.4	± 0.5
Redundancies (000s, aged 16 and over)	107	± 19	-8	± 27	19	± 25

#### Notes

1. The sampling variability estimates are for 95% confidence intervals and are calculated on data that are not seasonally adjusted. [Back to table](#)
2. These data are part of data table A11: Labour Force Survey sampling variability, which is part of the Labour market overview, UK release. [Back to table](#)

Table 2: Summary of employee earnings, seasonally adjusted, Great Britain, December 2019 to February 2020

	<b>Annual growth rate (estimate)</b>	<b>Sampling variability of growth rate (1)</b>
Total pay (nominal)	2.8	± 0.5
Total pay (real)	1.2	
Regular pay (nominal)	2.9	± 0.5
Regular pay (real)	1.3	

Source: Office for National Statistics – Monthly Wages and Salaries Survey

## Notes

1. The sampling variability estimates are for 95% confidence intervals (where we are 95% certain the true value lies within the specified range) and are calculated on not seasonally adjusted data for single month growth rates for the 12 months from January to December 2014. It is not possible to calculate confidence intervals for growth rates in real terms. [Back to table](#)

## 9 . Glossary

### Average weekly earnings

[Average weekly earnings](#) measures money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises as they also reflect, for example, changes in the overall structure of the workforce. More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

### Economic inactivity

People not in the labour force (also known as [economically inactive](#)) are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

### Employment

[Employment](#) measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment. A more detailed explanation is available in our [guide to labour market statistics](#).

### Unemployment

[Unemployment](#) measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (those in work plus those seeking and available to work) who are unemployed.

## Vacancies

[Vacancies](#) are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey; this is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry and fishing (a small sector for which the collection of estimates would not be practical).

A more detailed [glossary](#) is available.

## 10 . Measuring the data

### Coronavirus (COVID-19)

In response to the developing coronavirus (COVID-19) pandemic, we are working to ensure that we continue to publish economic statistics. For more information, please see [COVID-19 and the production of statistics](#).

We have reviewed all publications and data published as part of the labour market release in response to the COVID-19 pandemic. This has led to the [postponement of some publications and datasets](#) to ensure that we can continue to publish our main labour market data. This will protect the delivery and quality of our remaining outputs as well as ensuring we can respond to new demands as a direct result of COVID-19.

Ahead of the latest labour market statistics release, David Freeman, head of labour market statistics at the Office for National Statistics (ONS), has looked at how the ONS is responding to the pressing need for new information in his blog, [Measuring the labour market during Coronavirus](#).

For more information on how labour market data sources, among others, will be affected by the COVID-19 pandemic, see the [statement](#) published on 27 March 2020.

Data in this statistical bulletin and accompanying datasets relate to periods that are largely unaffected by recent developments (Labour Force Survey (LFS) interviews that took place throughout the three-month reference period of December 2019 to February 2020; Claimant Count statistics relate to the second Thursday of the reference month; Average Weekly Earnings data relate to periods up to and including February 2020; vacancies statistics relate to the first Friday of the reference month, unless this is the first day of the month, in this case the reference date moves to the second Friday of the month; and workforce job estimates relate to reference periods in December 2019).

Our latest data and analysis on the impact of COVID-19 on the UK economy and population is now available on our dedicated [COVID-19 webpage](#). This will be the hub for all special COVID-19-related publications, drawing on all available data.

### After EU withdrawal

As the UK leaves the EU, it is important that our statistics continue to be of high quality and are internationally comparable. During the transition period, those UK statistics that align with EU practice and rules will continue to do so in the same way as before 31 January 2020.

After the transition period, we will continue to produce our labour market statistics in line with the UK Statistics Authority's [Code of Practice for Statistics](#) and in accordance with International Labour Organization (ILO) definitions and agreed international statistical guidance.

The employment, unemployment and economic inactivity estimates rely on data collected from the LFS, a survey run by field interviewers with people across the UK every month.

The [LFS performance and quality monitoring reports](#) provide data on response rates and other quality related issues for the LFS, including breakdowns of response by LFS wave, region and question-specific response issues. The average weekly earnings and vacancies estimates rely on data collected from surveys of employers.

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in the following Quality and Methodology Information (QMI) reports:

- [LFS QMI](#)
- [Average weekly earnings QMI](#)
- [Vacancy Survey QMI](#)

## Future publication dates

Because of a public holiday in Northern Ireland, the July 2020 and July 2021 labour market publication dates have both been moved two days later. This change will ensure that users across the UK have the same access to advice from the teams who produce the statistics on the day of release. For further information, please see [Statement on changing the release dates of ONS statistics to avoid public holidays](#).

## 11 . Strengths and limitations

### Accuracy of the statistics: estimating and reporting uncertainty

The figures in this bulletin come from surveys, which gather information from a sample rather than from the whole population. The sample is designed to be as accurate as possible given practical limitations such as time and cost constraints. Results from sample surveys are always estimates, not precise figures. This can have an impact on how changes in the estimates should be interpreted, especially for short-term comparisons.

As the number of people available in the sample gets smaller, the variability of the estimates that we can make from that sample size gets larger. Estimates for small groups (for example, unemployed people aged between 16 and 17 years), which are based on small subsets of the Labour Force Survey (LFS) sample, are less reliable and tend to be more volatile than for larger aggregated groups (for example, the total number of unemployed people).

In general, changes in the numbers (and especially the rates) reported in this bulletin between three-month periods are small and are not usually greater than the level that can be explained by sampling variability. Short-term movements in reported rates should be considered alongside longer-term patterns in the series and corresponding movements in other sources to give a fuller picture.

Further information is available in [A guide to labour market statistics](#).

## **Where to find data about uncertainty and reliability**

[Dataset A11](#) shows sampling variabilities for estimates derived from the LFS.

Sampling variability information for average weekly earnings growth rates is available from the “Sampling Variability” worksheets within [datasets EARN01](#) and [EARN03](#).

The sampling variability of the three-month average vacancies level is around plus or minus 1.5% of that level. Information on revisions is available in the [labour market statistics revisions policy](#).

<b>REGIONAL SUMMARY</b>		
23	Regional labour market summary	<a href="#">Dataset A07</a>

(\*) Tables 2 and 10 in the Statistical Bulletin pdf file have been amalgamated into one spreadsheet (Dataset A05 SA).

(\*\*) Table JOBS02 provides more detail than Table 6 in the Statistical Bulletin pdf file.

The following symbols are used in the tables: p provisional, r revised, .. Not available, \* suppressed due to small sample size.

The four-character identification codes appearing in the tables are the ONS references for the data series appearing in the Labour Market Statistics dataset which is available on the website at:

<https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/employmentandemployeetypes/datasets/labourmarketstatistics>

## Summary of labour market statistics published on 21 April 2020

Series	Reference period	Latest estimate	Last time higher	Last time lower	Comparable data begins in
Employment level (aged 16 and over)	Dec-Feb 2020	33.073 million	Never	Nov-Jan 2020 (32.985 million)	Jan-Mar 1971
Employment rate (aged 16 to 64)	Dec-Feb 2020	76.6%	Never	Nov-Jan 2020 (76.5%)	Jan-Mar 1971
Unemployment level (aged 16 and over)	Dec-Feb 2020	1.364 million	Sep-Nov 2018 (1.37 million)	Nov-Jan 2020 (1.343 million)	Jan-Mar 1971
Unemployment rate (aged 16 and over)	Dec-Feb 2020	4.0%	Aug-Oct 2018 (4.1%)	Nov-Jan 2020 (3.9%)	Jan-Mar 1971
Inactivity level (aged 16 to 64)	Dec-Feb 2020	8.37 million	Nov-Jan 2020 (8.431 million)	Nov-Jan 1992 (8.356 million)	Jan-Mar 1971
Inactivity rate (aged 16 to 64)	Dec-Feb 2020	20.2%	Nov-Jan 2020 (20.4%)	Never	Jan-Mar 1971
Average Earnings (total pay - nominal)	Dec-Feb 2020	2.8%	Nov-Jan 2020 (3.1%)	May-Jul 2018 (2.6%)	Jan-Mar 2001
Average Earnings (regular pay - nominal)	Dec-Feb 2020	2.9%	Nov-Jan 2020 (3.1%)	Apr-Jun 2018 (2.7%)	Jan-Mar 2001
Average Earnings (total pay - real)	Dec-Feb 2020	1.2%	Nov-Jan 2020 (1.5%)	Aug-Oct 2019 (1.1%)	Jan-Mar 2001
Average Earnings (regular pay - real)	Dec-Feb 2020	1.3%	Nov-Jan 2020 (1.5%)	Oct-Dec 2018 (1.2%)	Jan-Mar 2001
Vacancies level	Jan-Mar 2020	795,000	Dec-Feb 2020 (817,000)	Jun-Aug 2017 (793,000)	Apr-Jun 2001

Source: Labour Force Survey

Labour market statistics enquiries: [labour.market@ons.gov.uk](mailto:labour.market@ons.gov.uk)

1. The Labour Force Survey (LFS) is a survey of households in the UK.

2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

4. The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

### Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

### Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

Source: Labour Force Survey

1. The split between full-time and part-time employment is based on respondents' self-classification.

Labour market statistics enquiries: labour.market@ons.gov.uk

2. This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.

3. These series cover Employees and Self-employed only. These series include some temporary employees recorded in columns 13 to 19.

4. The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of columns 21, 23, 24 and 25.

Source: returns from public sector organisations

**Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:**

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods.

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

Royal Bank of Scotland plc is included in the public sector from December 2008 but in the private sector for earlier time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods.

Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods.

Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods.

Housing associations in Northern Ireland are included in the public sector back to the start of the time series in March 1999.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for assessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

1. Estimated as the difference between LFS total employment and the data from public sector organisations.

2. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.

3. This series excludes locally engaged staff stationed outside the United Kingdom.

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The total series includes people who do not state their country of birth or nationality. The total levels series MGTM does not therefore equal the sum of the "UK" and "Non-UK" series.
2. This series consists of all 27 EU member states excluding the UK. This series equals the sum of EU14, EU8, EU2 and Other EU.
3. Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden.
4. Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic and Slovenia.
5. Romania and Bulgaria.
6. Cyprus, Malta and Croatia.
7. Total Non-EU equals the sum of Other Europe, Total Africa, Total Asia and Total America and Oceania, and excludes the UK.

The estimates shown in this table relate to the number of people in employment and should not be used as a proxy for flows of foreign migrants into the UK.

# NON-UK WORKERS

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series.
2. This series consists of all 27 EU member states excluding the UK.
3. This series consists of all countries outside the EU excluding the UK.
4. This series consists of those people whose main reason for being economically inactive was because they were students. It does not include all students as some students will be included in the employment and unemployment estimates.

Source: Labour Force Survey

Labour market statistics enquiries: [labour.market@ons.gov.uk](mailto:labour.market@ons.gov.uk)

1. Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who were not in employment, education or training ("NEET") cannot therefore be derived from this table. Estimates of young people who were NEET are published separately at:

<https://www.ons.gov.uk/employmentandlabourmarket/peoplenotinwork/unemployment/bulletins/youngpeoplenotineducationemploymentortrainingneet/latest>

2. People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

3. Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

1. Estimates of total pay include bonuses but exclude arrears of pay.

2. The figure in brackets is the percentage of whole economy employment in that sector or industry for the latest time period.

3. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

1. Estimates of total pay include bonuses but exclude arrears of pay.

2. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

3. Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

Sources: EUROSTAT, OECD, national statistical offices.  
Labour market statistics enquiries: labour.market@ons.gov.uk

(\* Note: The UK rates shown in this table are as published by EUROSTAT (the EUs statistical office). See Table 1 for the latest rates for the UK as published by ONS.

Caution should be taken with international comparisons of labour markets during the COVID-19 pandemic, since definitional definitions of economic measures, such as furloughing, will vary between countries.

- All employment rates shown in this table are for those aged from 15 to 64 except for the rate for the United States published by OECD which are for those aged from 16 to 64.
- The employment rates for the EU are published by EUROSTAT and are not seasonally adjusted. EUROSTAT do not publish seasonally adjusted (SA) employment rates but SA rates for some EU countries are published by OECD. These OECD employment rates are available on our website at [dataset A10](#).
- Unemployment rates published by EUROSTAT for most EU countries (but not for the UK), are calculated by extrapolating from the most recent LFS data using monthly registered unemployment data. A standard population basis (15-74) is used by EUROSTAT except for Spain, Italy and the UK (16-74). The unemployment rate for the US is based on those aged 16 and over, but the rates for Canada and Japan are for those aged 15 and over. All unemployment rates shown in this table are seasonally adjusted.
- The "Total EU" series consist of all 27 EU countries. The Eurozone figures consist of the following EU countries: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovak Republic, Slovenia and Spain.
- The EU unemployment rates are as published on the EUROSTAT database. For Sweden the rates on the database differ from those shown in the EUROSTAT News Release published on 1 April 2020. This is because the figures for Sweden on the database are seasonally adjusted estimates but the figures for Sweden shown in the News Release are the trend component.

Jan 19	275	26	249	82	23	59	44
Jan 20 (p)	242	50	192	99	34	65	43

Relationship between columns 1=2+3; 4=5+6

Data source: ONS Labour Disputes Survey  
Labour disputes enquiries 01633 455400

- Estimates of working days lost and workers involved are shown to the nearest thousand. Unrounded estimates of less than 500 therefore round to zero.
- Due to rounding the working days lost for the public and private sectors may not add up to the total working days lost.
- The latest 12 month cumulative totals for the figures in these columns will not necessarily equal the sum of the 12 months as some disputes continue for over one month. These disputes appear in each month's data, but only once in the total.

N92000002	Northern Ireland	13	0.9	17	1.3	-4	-0.5	-11	-0.9

The Labour Force Survey is tabulated by region of residence.

1. Economically active = Employment plus Unemployment.

2. Denominator = all persons aged 16 to 64.

3. Denominator = total economically active

# REGIONAL SUMMARY

## 23(2) Regional summary of Workforce Jobs

Thousands,  
seasonally adjusted

Area Codes	Area Names	December 2019	Change on September 2019
K02000001	United Kingdom	35,832	67
K03000001	Great Britain	34,904	68
E92000001	England	30,615	63
E12000001	North East	1,211	-15
E12000002	North West	3,796	-53
E12000003	Yorkshire and The Humber	2,782	27
E12000004	East Midlands	2,448	-1
E12000005	West Midlands	2,941	-21
E12000006	East	3,269	40
E12000007	London	6,134	43
E12000008	South East	4,973	42
E12000009	South West	3,061	1
W92000004	Wales	1,467	-27
S92000003	Scotland	2,822	32
N92000002	Northern Ireland	921	0

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The UK workforce jobs estimates therefore do not equal the sum of the regional estimates.
